

## Download & Install Instructions for SOLIDWORKS 2021

- A. If you are upgrading from a previous version of SolidWorks you must do a complete uninstall of the old version before beginning the install process for the new version. See the next page for instructions on how to do a complete uninstall.
- B. To install SolidWorks 2021, do the following:
1. Go to <http://www.solidworks.com/SEK>
  2. Fill out the name and email fields. Select '*I already have a Serial Number that starts with 9020*'. Select the 2021-2022 version. Complete the other fields then select *Request Download*.

The screenshot shows a web form titled 'Contact Information' and 'Product Information'. In the 'Contact Information' section, there are fields for 'FIRST NAME', 'LAST NAME', 'EMAIL', and a dropdown menu currently set to 'Student'. In the 'Product Information' section, there are two radio button options: 'I already have a Serial Number that starts with 9020' (selected with a blue dot) and 'Academic Version'. The 'Academic Version' section has two radio button options: '2021-2022' (selected with a blue dot) and '2020-2021'. A red arrow points to the 'Yes' radio button under the first option, and another red arrow points to the '2021-2022' radio button. At the bottom right, there is a blue button labeled 'Request Download'.

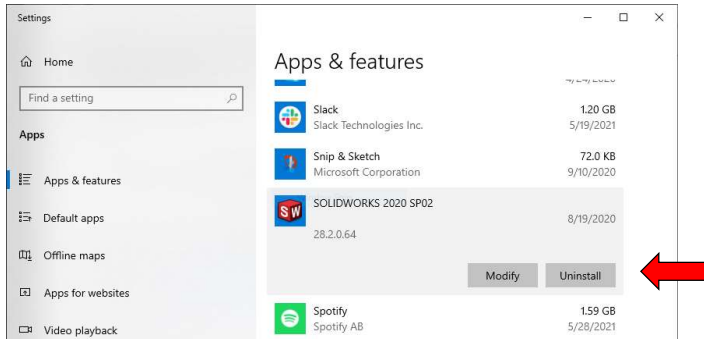

3. Run the program you just downloaded, select Unzip, and then install the software using the on screen instructions. Select all the default choices.
4. Use Serial Number **9020-0049-8724-8527-WXDF-5XG8** in the field labeled '3D Design'. You don't need to enter any additional serial numbers.
5. To save disk space, you can select 'Change' next to Products and deselect certain sub-programs (won't need Plastics or Electrical). Be sure to check the box 'I accept the terms ...'.

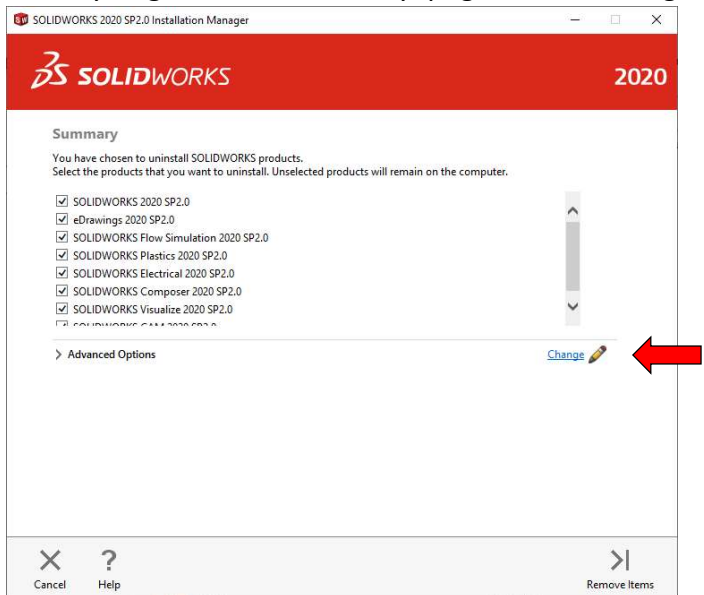

6. Done.

## How to do a Complete Uninstall of SolidWorks

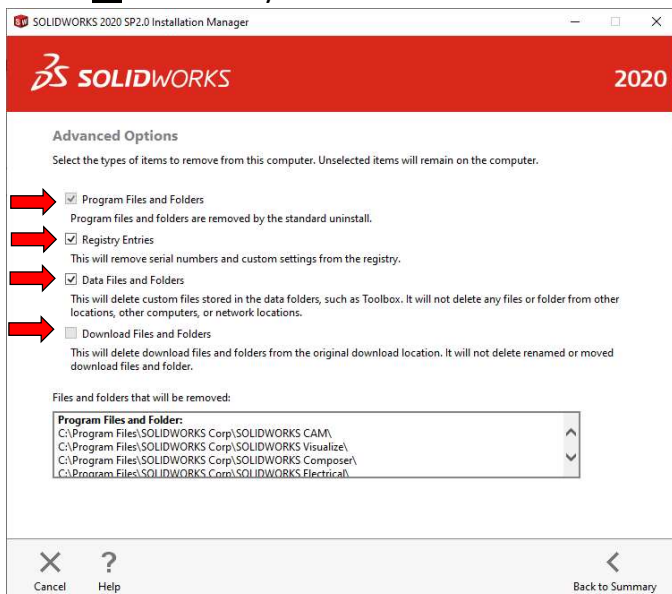

1. Open 'Apps and Features' in Windows.
2. Find the SolidWorks program and select 'uninstall'.

3. When you get to the 'Summary' page, select 'Change'.

4. Select all the boxes you can.

5. Continue with the uninstall process. If asked, select 'deactivate license'.
6. After the process is complete, reboot your computer before installing a new version of SolidWorks.
